

Sender Available Headers

Senders can be imported into WTS as either part of your account's initial set-up or when needed.

Sender Imports are handled via a CSV (Comma Separated Values) file.

Importing Senders

The CSV File needs a header listing the column names. There should be the same number of columns throughout the file as mentioned in the header.

The Data is mapped as follows:

(Where there are multiple Accepted fields, they will be concatenated and comma delimited in the order shown here.)

WTS Field	Accepted Fields	Mandatory
Sender Name	Sender	Yes
	SenderName	
	Name	
Address Line 1	Address	No
Address Line 2	Address2	No
City	City	No
State	State	Yes
	County	
Zipcode/Postal Code	Zip	No
	Postcode	
Company	Company	No
Email	Email	No
Cell Phone	Cell	No
	Mobile	
	Cellphone
